Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-16, drawn to an endless crawler belt.

Group II, claims 17 and 18, drawn to an elastic sheet.

Group III, claims 19-25, drawn to a method of manufacturing an endless crawler belt.

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The endless crawler belt of Group I has a structure in which the ends of the form a stepped configuration where they are overlapped (claim 11). This special technical feature is not included in the manufacturing of the endless crawler belt of Group III.

Art Unit: 3617

The elastic sheet of Group II is an intermediate product having an intended use, but lacking the special technical features of the ends of the cord being overlapped as set forth in Groups I and III.

The manufacturing process of Group III includes the special technical features of a portion of the elastic sheet being coated with a material, and the ends of the elastic sheet having pressure applied thereto. Neither of these special technical features are found in Groups I and II.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

A first embodiment of the endless crawler belt shown in figures 1-6.

A second embodiment of the belt shown in figures 7-10.

A third embodiment of the belt shown in figures 13-17.

A fourth embodiment of the belt shown in figures 18-22.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Art Unit: 3617

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Claims 1-10 appear to correspond to the first embodiment.

Claim 11 appears to correspond to the third embodiment.

Claims 12-16 appear to correspond to the fourth embodiment.

The following claim(s) are generic: 1, 17, 19-21, 23, and 24.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

As the species define different constructions of the belt, they lack common technical features.

6. A telephone call was made to Thomas Pardini on May 16, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3617
